

HDL[®]

Transform your Apple iPad into a **wireless in-wall** touch screen panel

The iPad securely mounts to the wall creating a touch screen controller ideal for home automation, security and home entertainment solutions.

The iPad wall mount comprises of an in-wall docking station and a low-profile bezel with magnetic attachment. The iPad is powered by POE (adapter included).

Choice of **Colours**

Designed with both classic and contemporary interiors in mind, we have a choice of three desirable tones that will suite a range of decors: Black Ice, Pure White and Beach Stone.

What can I **control**?

iLife is an attractive and simple to use app which is available on both smart-phone and tablet platforms. It allows effortless control of your lighting, heating, shading, music, access control, air-conditioning, AV and third-party devices. Why make things complicated?

Magnetic Bezel

HDL has used cutting edge industrial engineering to create a striking bezel design that clips magnetically into place.

Securely Mounted and protected

The design of the mount ensures a perfect snug fit and holds it firmly and safely in place. It can be mounted vertically or horizontally.

PoE Module + enabled for **iPad 2 and iPad Air**

For all iPad™ generations – compatible with both Lightning and 30-pin technology
